

RACHEL WILCOX

ARTIST | CONTENT CREATOR | GRAPHIC DESIGNER

I am a creative, ambitious individual with a talent for thinking outside the box and coming up with innovative ideas and designs. Since 2014 I have been building on my creative practices and abilities by employing Adobe creative software. Building on this I attended the University of Salford graduating with a degree in TV, Film, and Stage Design. I have since found work in several creative roles both within the TV and Film industries and in other creative industries. I have particularly enjoyed working in both a graphic design capacity and as a content creator/product photographer. I have found that my mixed background has lent itself to each of these roles in new and unexpected ways. I hope to continue growing and exploring my artistic practices throughout my creative career - where ever it may take me!

University of Salford
TV AND FILM STAGE DESIGN

- Through the work placement module I have gained valuable understanding of the industry, and the many roles to be fulfilled.
- Developing an understanding of the importance of delivering pitches and communicating your work to other individuals.
- This course has allowed me to expand my technical skills using Adobe Software, as well as teaching me valuable new skills in Sketch-Up, model making and technical drawing.
